**DETAILED ACTION**

**Status of the Application**

Receipt of the Amendment after Non-Final Office Action, Applicant's Arguments/Remarks, the Terminal Disclaimer and the request for extension of time (3 months-granted), all filed 07/05/05 is acknowledged.

The 35 U.S.C. §101 statutory-type double patenting rejection of claim 1 has been withdrawn, by virtue of Applicant's amendment filed 07/05/05. The non-statutory obviousness-type double patenting rejection of claims 1-15 has been withdrawn, by virtue of Applicant's submission of a Terminal Disclaimer filed 07/05/05.

Claims 1 and 3-15 are pending. Claims 1 and 3 have been amended. Claim 2 has been cancelled. Claims 1 and 3-15 are allowed.

***Terminal Disclaimer***

The terminal disclaimer filed on 07/05/05 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of Patent No. 6,509,013 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Allowable Subject Matter***

Claims 1 and 3-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reasons for allowance are that the prior art does not disclose nor fairly suggest the instant pharmaceutical composition comprising a carrier and a crosslinked, water insoluble polyallylamine homopolymer, wherein said polyallylamine homopolymer comprises repeat units represented by the formula depicted in claim 1, wherein n is an integer, wherein said polyallylamine homopolymer is crosslinked with an epichlorohydrin crosslinking agent, and wherein the homopolymer is fully protonated, partially protonated or unprotonated. The instant invention demonstrates superior results because it provides for improved phosphate binders, which can be administered orally in acceptable dosage levels without resulting in many serious side effects. The invention provides for an effective treatment for decreasing the serum level of phosphate by binding phosphate in the gastrointestinal tract, without concomitantly increasing the absorption of any clinically undesirable materials, particularly calcium or aluminum.

In Applicant's response filed 07/05/05, Applicants have amended instant claim 1 to include the instant claim 2 limitation 'wherein said polyallylamine homopolymer is crosslinked with an epichlorohydrin crosslinking agent', which overcomes the 35 U.S.C. §101 statutory-type double patenting rejection of claim 1. Additionally, Applicants have submitted a Terminal Disclaimer (filed 07/05/05) to obviate the non-statutory obviousness-type double patenting rejection of claims 1-15. Accordingly, all outstanding rejections have been withdrawn. This application is now in proper condition for allowance, rendering it non-obvious and patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
